Colour description : natural

Matches : Milk-like transparent white colour can differ per kind of material.

Featured colours reserved. Due to the screen differences in colour may occur.

Material:

Nylon-6 (PA-6)

Material number:

01

General information

A strong, tough and durable material. Suitable for connecting elements and other technical components. Thanks to self lubricant properties ideal for slide bearings. Always has to acclimatize for a few days after injection moulding, taking approximately 3% moisture to obtain its normal strenght. Operational temperature can go up to 100-120°C temporarily for non-critical parts. Many nylons are self extinguishing.
