

COVER CAP SERIE 006-k4

- Made from polyethylene (Hd-PE)
- Available in various colours
- For decorative and protective purposes
- Also available in assortment box 019
- Check our extensive ranges of nylon or metal screws and nuts

Material:

Material number:

Polyethylene (Hd-Pe)

04

General information

High density polyethylene is resistant to many chemicals. Therefore especially suitable for coverplugs and caps. The material is a little less flexible than low density Polyethylene, but has a better scratch firmness. Does not take in moisture and therefore very suitable for electrical insulation. Polyethylene can not be glued, burns after lighting it and may discolour and becomes brittle after exposure to direct sunlight.
